# Welcome to the Natural Resources Program at OSU

Students who graduate with a BS degree in Natural Resources from OSU will learn to integrate technical field or laboratory skills with analytical skills to solve critical natural resource problems. The curriculum is designed to help students acquire knowledge about a range of natural resource issues, work in interdisciplinary teams, and deal with social and political aspects of resource management.

Students will acquire knowledge in biophysical sciences, social sciences, math and statistics. They will learn holistic resource management approaches that emphasize the interconnectedness of humans and the environment. In addition, students will develop a toolbox of resource management skills such as communication, collaboration, analysis, assessment and planning. They will explore the conservation and management of key resources which include fish and wildlife, land and water resources, and a wide range of ecosystems from forests to rangelands. A disciplinary depth in a focused area is developed through a required specialization option. Students may choose from a number of pre-approved specialization options, or create an individualized (student designed) specialization option.

The Natural Resources major is also available at the OSU-Cascades Campus in Bend and through the OSU Extended Campus program. The Natural Resources major is an interdisciplinary program administered by the College of Forestry.

Only two courses used to complete the Natural Resources major requirements may be taken S/U. The Natural Resources Specialization Option will have a minimum GPA requirement of 2.25.

## Curriculum Overview

The Bachelor of Science in Natural Resources curriculum consists of three blocks of study:

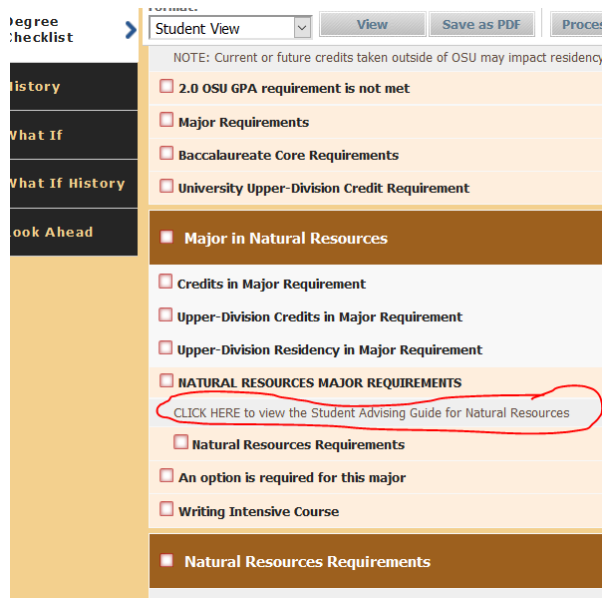

**Baccalaureate Core** - A standard set of courses that are required for all Oregon State University students. (This section is waived for Post-Baccalaureate Students and Associate of Arts Oregon Transfer degree students except for two “Synthesis” courses.)

**Natural Resources “Major requirements”**- The requirements cover interdisciplinary foundations of environmental problem solving, advanced communications, biophysical sciences, mathematics and statistics, resource management, social and political dimensions, and spatial analysis.

**Natural Resources “Specialization Option”** – A focused areas of study that will tailor your degree to your career interests and goals. Minimum GPA for this block is 2.25. Minimum number of credits in the option is 40 with at least 20 upper division credits required.

## How to Use This Advising Guide

The Student Advising Guide is a road map to the completion of your degree. It lists all the requirements that you need to earn the degree and information to help you make choices along the way. As a digital document it is searchable and has many helpful links to get you to other resources. Clicking on the blue underlined course numbers will take you to the [OSU Schedule of Classes](#) where you will find the CRN number, course capacity, instructor's name, and other important information about each course. The guide is updated frequently and you can find the latest version on the [Natural Resources Program Website](#) and through a link in your MyDegrees audit.

The screenshot shows a web interface for a degree checklist. On the left, there is a navigation menu with tabs: "History", "What If", "What If History", and "Look Ahead". The main content area is titled "Student View" and includes buttons for "View", "Save as PDF", and "Process". A note at the top states: "NOTE: Current or future credits taken outside of OSU may impact residency". Below this, a list of requirements is shown, each with a checkbox:

- 2.0 OSU GPA requirement is not met
- Major Requirements
- Baccalaureate Core Requirements
- University Upper-Division Credit Requirement
- Major in Natural Resources
- Credits in Major Requirement
- Upper-Division Credits in Major Requirement
- Upper-Division Residency in Major Requirement
- NATURAL RESOURCES MAJOR REQUIREMENTS
- CLICK HERE to view the Student Advising Guide for Natural Resources
- Natural Resources Requirements
- An option is required for this major
- Writing Intensive Course
- Natural Resources Requirements

The purpose of the advising guide is to help you plan your academic program. Your MyDegrees audit has a “Planner” tab that will allow you to input your courses for future terms. This helps us predict the need for courses in future terms as well as help your advisor check to see if you are on the right track. Video tutorials on how to use the MyDegrees Planner are on the registrar’s website along with many other helpful tutorials. The year in which you are admitted to the Natural Resources major will determine your “catalog year” and the requirements in effect in that year are applicable to your academic program. However, all course choices available to you are listed in the advising guide so check here often to see any new additions to the course lists.

<https://registrar.oregonstate.edu/video-tutorials>

# MyDegrees

Oregon State University uses an online degree audit system to help you track your progress toward your degree. Take some time to familiarize yourself with the tools and information provided by this system. The MyDegrees system will automatically apply courses to requirements. You may notice that courses are listed as approved under several different requirements. **The course can only be used once within the NR major requirements or specialization option but CAN be double counted with the Baccalaureate core.** Be sure to let your advisor know where you want your courses to be applied. [Video tutorials](#) on using MyDegrees, registering for classes, adding and dropping classes and other helpful topics are available on the OSU Registrar's website.

## Requirements for Graduation

In addition to the University and degree program requirements, students in the **Natural Resources program** must also meet specific requirements to graduate.

**Minimum GPA met for the Specialization Option** – All specialization options have a minimum GPA of 2.25. You must have a cumulative OSU GPA of at least 2.0 to graduate.

**S/U Grading** - The Natural Resources Program allows up to two total S/U graded courses in courses taken for the major. A maximum of 36 credits can be taken S/U in the Baccalaureate Core. You should familiarize yourself with this and other [Academic Regulations](#).

**Double Counting with other majors, minors or certificates**- Courses may be double counted between the Baccalaureate Core and the Natural Resource major requirements or specialization. Courses may NOT be double counted within the NR major requirements and the specialization option. Courses are also allowed to be double counted in a minor, certificate or another major if allowed by the department the offers the credential. Students can find a table of Baccalaureate Core classes and the requirements where they double count in the major on the [Natural Resource Program website](#). Some credentials that the Natural Resources major is often pair up with are Sustainability major or minor, Soil, Botany, Fisheries and Wildlife Science, GIS certificate.

### The Numbers to Watch -

180 – The minimum number of quarter credits necessary to graduate from OSU.

60 - Minimum upper division (300-400 level) credits required to graduate from OSU.

124 - The maximum number of credits that can be transferred from a community college.

45 - of your last 75 credits must be earned at OSU **OR** you must have at least 150 total credits from OSU.

## Natural Resource Undergraduate Program Learning Outcomes

Students who graduate with a Natural Resources degree from OSU should be able to integrate technical “field” knowledge with analytical skills to solve important natural resource management problems. They should be able to communicate effectively, work collaboratively, assess their professional strengths and weaknesses, and be committed to continuous learning and professional development.

Specifically, they should be able to:

|  |  |
|--|--|
| <p><b>Describe ecological processes, including human impacts that influence ecosystem change, natural succession and the future sustainability of natural resources.</b></p> | <p><b>Coursework that Meets Outcome:</b><br/>Ecology<br/>Earth Science or Soil Science<br/>Climate Science<br/>Chemistry<br/>Spatial Analysis<br/>Specialization Options</p>   |
| <p><b>Characterize natural resources and be able to quantify at least one of these resources.</b></p>  | <p><b>Coursework that Meets Outcome:</b><br/>Earth or Soil Science<br/>Vegetation ID<br/>Animal ID<br/>Measurements (included in all NR Specialization Options)<br/>Spatial Analysis<br/>Students may select option courses that meet this outcome</p> |

|  |  |
|--|--|
| <p><b>Envision desired future conditions in an area to achieve a set of natural resource-related objectives, prescribe management actions needed to achieve those objectives, and evaluate success of these actions.</b></p>   | <p><b>Coursework that Meets Outcome:</b><br/> Environmental Assessment and Planning<br/> Students may select option courses that meet this outcome</p>   |
| <p><b>Describe how the use, management, and allocation of natural resources are affected by: laws, policies, economic factors (both market and non-market), and characteristics (including demographic, cultural, ethnic, and “values” differences) of private and public resource owners and users.</b></p> | <p><b>Coursework that Meets Outcome:</b><br/> Political Issues<br/> Resource Economics<br/> Natural Resource Decision Making (capstone course)<br/> Environmental Assessment and Planning<br/> Political Issues</p>  |
| <p><b>Communicate effectively, orally and in writing, with audiences of diverse backgrounds.</b></p>   | <p><b>Coursework that Meets Outcome:</b><br/> Baccalaureate Courses in:<br/> - Writing I and II<br/> - Speech<br/> - Writing Intensive Course<br/> - Cultural Diversity<br/> - Difference, Power, and Discrimination<br/> Natural Resource Decision Making (Capstone)<br/> Advanced Communications</p> |
| <p><b>Work effectively with, and within, interdisciplinary and diverse groups to resolve management problems and achieve management objectives.</b></p>  | <p><b>Coursework that Meets Outcome:</b><br/> Cultural Diversity (Baccalaureate Core)<br/> Difference, Power, and Discrimination (Baccalaureate Core)<br/> Natural Resource Decision Making (Capstone)<br/> Environmental Assessment and Planning<br/> Advanced Communications</p>                     |

# ACADEMIC ADVISING

## Advising Rights and Responsibilities

The College of Forestry is committed to helping students succeed. Each student is assigned an advisor within their academic department to assist with appropriate course selection, explain program options in line with student interests, and provide information about mentoring and other professional opportunities. In addition, advising personnel in the College Student Services office are a valuable resource for information and assistance regarding University rules and regulations, petitions, job placement, national and international exchange programs, and referrals to University programs and resources.

The advising effort is one of mutual respect and collaboration between you and your advisor. If the process is to be effective both you and your advisor must meet certain obligations. With that in mind, here are some key responsibilities for your relationship.

### As an advisee, you should:

- Understand and accept that you are ultimately responsible for your education and your own decisions.
- You will need a new registration PIN# each term except summer:

On Campus students must make an appointment with their advisor each term to receive their PIN#. Students should come prepared to their appointments with a written plan for courses they plan to register for and what requirements they intend to fulfill. Students should use the scheduler tool to plan a weekly class schedule and have some alternative classes selected in case they are unable to register for their first choices.

Ecampus students should contact their Advisor (via email or a phone/Zoom Web Conferencing appointment) prior to the term registration period. They should provide a written plan for courses that they plan to register for and what requirement they intend to fulfill. Include at least two alternative courses in case they are unable to register for your first choices. The Advisor will approve the course plan and provide the term registration PIN#. During appointments you should be near your computer and have your MyDegrees audit accessible.

- **Be prepared when you come to advising sessions.** Be active in your advising session and ask questions when you have them.
- Provide accurate and truthful information when being advised.
- Initiate a purposeful relationship with your advisor and make appointments when necessary or when in need of assistance. Appointments are available by phone and web conferencing and in the advising office. Advisors may vary in the type of advising appointments they offer.
- Keep your local address and phone up-to-date in Student Online Services profile and regularly checking your ONID account.
- Use only your ONID email (@oregonstate.edu) account to correspond with your advisor and include your student ID# in correspondence.
- Cancel appointments through the online appointment system when you are unable to make them.
- Learn and understand OSU's policies, procedures, and requirements as they relate to your academic success and/or degree completion.
- Follow through on plans-of-action identified during advising sessions.

**Advisors should:**

- Develop a purposeful relationship with and be an advocate for their advisees.
- Inform students of the nature of the advisor/advisee relationship.
- Assist students in defining and developing education, career and life plans.
- Provide timely and accurate educational information.
- Promote learning opportunities that will help students define or meet personal goals.
- Assist students in preparing a program that is consistent with their abilities and interests.
- Monitor progress toward educational/career goals.
- Interpret and provide rationale for institutional policies, procedures and requirements.
- Inform students of campus resources that can enhance or supplement their academic or personal experience.

## Make an Appointment with your Advisor

One of the key actions for academic success is having regular appointments with your Academic Advisor. Each student admitted to the Natural Resources Program will be assigned one of the advisors below. You can find your assigned advisors name in the first block on your MyDegrees page. You can schedule an appointment through our online appointment scheduling system which uses your ONID username, password and student ID#. You will receive email reminders about your appointment. If you can't attend your scheduled appointment please log back into the system to cancel the appointment so another student can use that time. If you have any problems with scheduling an appointment please contact your Advisor through email.

**Advising Staff:**

**NOTE: We are moving back to Peavy Hall! The new Peavy Hall will be called the Peavy Forest Science Complex (PFSC). The Student Services office, International Programs and our individual advising offices will be housed in Room 116 on the first floor of the new building.**

**Autumn Granger**

<http://undergrad.forestry.oregonstate.edu/advising/academic-advisors>

# Experiential Learning: Projects, Internships and Study Abroad

The Natural Resources program offers several ways for you to use experiential learning in your academic program. While not required, these credit-bearing opportunities provide valuable hands on experience that can prepare you to work in your field and build your resume before you graduate. You can use up to 6 credits of related experiential learning in your area of specialization or other major requirement if petitioned and approved in advance. You should declare your specialization option before submitting a proposal for a project, internship or study abroad credits that is related to your specialization. You will need to register for credits in the same term that you are actively working on the project, internship or study broad. For example, summer internships will require you to register for summer term. Experiential learning may encompass more than one term but you would need to register for credits for each term in which you are actively engaged. You should submit your proposal for your experiential learning credits at least TWO TERMS prior to the beginning of the term in which it occurs.

## NR 406 Project

A project is appropriate for those students who are interested in gaining skills in a very specific academic area or conducting undergraduate research. You may design your own project, work on a project with an agency, non-profit or community organization or assist a faculty member with their research. A faculty mentor will supervise your project and provide a grade for the project at the end of the term. Finding the faculty mentor is the responsibility of the student but your academic advisor can point you toward resources to help with your search. (Note: You may also have a site supervisor depending on the nature of the project.) Projects can be graded on a Pass/No Pass or A-F grading basis. You will submit a [proposal](#) that includes a description of your project, the learning objectives, the final product that documents your learning (e.g. paper, website, site plan, display, poster, etc.) You will pay the typical tuition fee per credit as you would for any other credit-bearing class. If you are conducting [undergraduate research](#) you can apply to have that noted on your OSU transcript.

## NR 410 Internship

An internship is similar to a project, but may have a broader focus and include more general skills. Both internships and projects require defined learning objectives and a final academic project (e.g. research paper, blog, site plan, website, poster, display, project, etc.) An internship might be a seasonal job, field work or part-time work over an extended period of time. It is different from a project because a Site Supervisor is *required* as well as an OSU Internship Supervisor. The Site Supervisor will provide expertise in the field and an assessment of your work upon completion of the internship. The OSU Internship Supervisor will monitor your progress and assign the grade. Internships can be graded on a Pass/No Pass or A-F grading basis. You will submit a professionally written [proposal](#) that includes a description of your project, the learning objectives, and the final product that documents your learning. The research paper (or other product or deliverable) will be graded by the OSU Internship Supervisor. You can find many internships and seasonal work positions posted on the [College of Forestry Employment Opportunities](#) webpage.

## Study Abroad

The College of Forestry [International Programs](#) organizes three types of opportunities abroad: Faculty-Led Programs, Exchange & Study Abroad and Internships & Research. These credit-bearing opportunities are eligible for university and college scholarships. *Faculty-led programs* are led by College of Forestry Faculty. These programs study a specific theme or focus, are eligible for academic credit and are usually shorter than the length of a term. Often they are conducted during breaks such as summer or spring break. These are ideal for working students or Ecampus students who would like a short term hands on intensive experience. *Exchange programs* are typically a semester or academic year and integrates into a host university's academic and student community. *Study abroad programs* vary in duration and focus and can include intensive language or field studies for single and multiple terms abroad. *International internships* allow students to pursue professional level work experience overseas while receiving academic credit. Most international internships are a minimum of ten weeks in duration and can take place any time of the year. The College of Forestry and partner programs offer internships all over the world!

In addition [OSU Global Opportunities](#) has a wide range of programs and scholarship offering. [IE3 Global](#) provides international internships in 50 different countries.

**Contact your Academic Advisor to discuss which experiential learning opportunity would best fit your academic plan!  
Templates for the petition forms for NR 406 and NR 410 can be found on the NR Program website.**

*\*One credit is equal to 30 hours of academic related work*

## Natural Resources Accelerated Master's Platform: Student FAQ

You can get a jumpstart on your Master of Natural Resources (MNR) while finishing your undergraduate degree in Natural Resources! The Accelerated Master's Platform (AMP) allows undergraduate OSU Natural Resources students to take graduate level courses that will be applied to their B.S. degree and transfer those courses to the Master of Natural Resources program at OSU. Students apply to the AMP program after completing at least 105 credits in their undergraduate degree program and then, if accepted, matriculate into the master's program immediately after graduation. Up to 12 graduate credits can be transferred and with careful planning full-time students could complete a master's degree within 1 year of finishing their bachelor's degree. Financial aid is applicable to the graduate level courses that are taken for the undergraduate degree.

The Master of Natural Resources degree is currently offered through Ecampus. The Natural Resources B.S. degree is offered on the Corvallis Campus, OSU-Cascades and Ecampus.

### ***What is the Accelerated Master's Platform (AMP)?***

The Accelerated Master's Platform is designed to allow undergraduate students in the Natural Resources B.S. program to take graduate level courses that can be applied to the [Master of Natural Resources](#) degree. Students can take up to 12 credits of graduate level coursework that will transfer to the master's program at OSU and also be applied to their Natural Resources B.S. degree. Currently the MNR degree program is offered through OSU Ecampus although some specific courses may also be available on the Corvallis and/or Cascades campus.

### ***Who is eligible for the AMP program?***

All Natural Resources undergraduate students can apply if they meet the admission criteria. Unfortunately the AMP program is not open to Post Baccalaureate students.

### ***What are the admission criteria?***

Applicants must have a cumulative GPA of at least 3.25 or above and have completed 105 credits in their undergraduate program. Applicants should also complete the WIC course for the Natural Resources B.S. before applying to the Accelerated Masters Platform.

### ***How do I apply?***

The first step is to meet with the AMP Program Coordinator for the undergraduate Natural Resources program (Terina McLachlain). The program coordinator will help you prepare your application materials which include: 3 letters of reference, a completion plan that includes the graduate level courses that will be taken, and a statement of graduate research or project objectives. One of the letters must be from the applicant's potential graduate faculty advisor. It will be the applicant's responsibility to find the graduate faculty advisor who will agree to mentor the

student through both the AMP and the MNR academic programs. The deadline to submit the application is 3 terms prior to anticipated graduation from the undergraduate degree. No GRE is required for AMP students and the graduate school admission fee is waived.

***How do I find a graduate faculty advisor?***

A list of possible faculty advisors will be provided but any OSU faculty member could potentially serve as a graduate faculty advisor if they are willing to do so. Students will reach out personally or through email to request a faculty member as an advisor. Applicants should find an advisor who has an area of research and expertise that is relevant to the student's proposed research or project.

***What requirements do I need to meet to stay in the AMP program?***

- All graduate level coursework to be applied to the MNR must be 3.0 or better.
- Students must maintain a cumulative 3.0 GPA in their undergraduate program to remain in the program.

***Are there required classes in the Accelerated Master's Program?***

AMP students will be required to take MNR 560 Master's Case Study in place of NR 455 NR Decision Making (4 credits) as the capstone course for the Natural Resources undergraduate program. Additionally they will be required to take FES 585 Consensus and Natural Resources (3 credits) which will replace FES 485 in the Interdisciplinary Foundations block of the undergraduate program. Other suggested courses are FES 545 Ecological Restoration (3 credits) and FES 586 Public Lands Policy and Management (3 credits). Many other graduate level courses can be applied to the undergraduate major requirements.

In preparation for courses in the MNR program AMP students should take the 2XX series of biology or an equivalent transferable biology series for science majors. In most cases they should have also completed BI 370 General Ecology or an equivalent as well. Careful planning will insure that any prerequisite courses for graduate level courses will be taken as an undergraduate.

***Will I be automatically admitted to the MNR degree program when my bachelor's degree is finished?***

After completion of the Natural Resources B.S. degree program all AMP participants will be reviewed and admitted on a case by case basis. Application is competitive and not all applicants who meet the application criteria will be admitted.

***Who should I contact if I am interested in the AMP program?***

AMP Program Coordinator

Terina McLachlain, NR Program Manager/Academic Advisor

541-207-3580

[terina.mclachlain@oregonstate.edu](mailto:terina.mclachlain@oregonstate.edu)

<http://nr.forestry.oregonstate.edu/accelerated-masters-platform>

# Baccalaureate Core

The [Baccalaureate Core](#) is an OSU requirement for all majors. Post-Baccalaureate and Associate of Arts Oregon Transfer degree students need only complete the Synthesis and Writing Intensive Course requirements. Students must complete course work in four areas: Skills, Synthesis, Perspectives and a Writing Intensive Course.

## Your First 45 hours of OSU generated credits:

To support students' success in all courses, the following first-year Skills courses are to be taken and completed satisfactorily within the first 45 hours of OSU-generated credits:

- *Writing I (WR 121)*
- *Mathematics*
- *Speech*

To prepare for the upper-division Writing Intensive Course in the major, the following Skills course is to be taken and completed satisfactorily within the first 90 hours of OSU-generated credits:

- *Writing II*

For transfer students with sophomore standing or above, *Writing II and Speech* must be completed within the first 45 hours of OSU-generated credits. These requirements apply to all students, whether full time or part time.

**It is highly recommended that you complete your Natural Resources requirements for math\*, statistics, chemistry, and biology within your first year.**

*\*Some students with little math background or who took math long ago need to start with remedial courses such as MTH 65 and/or MTH95. You might also try some free online tutorials to get your math skills up to speed. There are many sites available but one of the best is the Kahn Academy ([www.kahnacademy.org](http://www.kahnacademy.org).) Contact your advisor for an up to date list of tutorials and refresher courses.*

## Do I need to take the ALEKS Math Placement Test?

- All first-year students must take the ALEKS Math Placement Test.
- All transfer and post-baccalaureate students newly admitted to OSU must take the ALEKS Math Placement Test, unless you have earned a C- or better in a college-level course from another college or university; or via a CLEP exam, AP exam, or IB exam.
- If it has been more than a year since your last math class, taking the ALEKS Math Placement Test is strongly recommended--the Learning Module, an individualized tutorial, will provide a good refresher for your next course.

**ALEKS Math Placement Test:** <http://www.math.oregonstate.edu/mlc-placement-home>

| SCORE      | COURSE PLACEMENT  |
|------------|---|
| 75% - 100% | *MTH 251: Differential Calculus   |
| 60% - 74%  | *MTH 112: Elementary Functions<br>*MTH 241: Calculus for the Management and Social Science<br>*MTH 245: Mathematics for Management, Life and Social Science   |
| 46% - 59%  | *MTH 105: Introduction to Contemporary Mathematics<br>*MTH 111: College Algebra   |
| 30% - 45%  | MTH 095: Intermediate Algebra<br>MTH 103: Algebraic Reasoning   |
| 15% - 29%  | MTH065: Elementary Algebra  |
| 0% - 14%   | If your score was below 15%, you did not place into any OSU Mathematics Course. You can use the ALEKS Learning Modules to improve your score or consider enrolling in a community college to take the appropriate prerequisite courses. |

If a course has been approved for the Baccalaureate Core an asterisk (\*) will appear by the course number. A complete list of courses (both Ecampus and On Campus) fulfilling the Baccalaureate Core requirements is found at:

<http://catalog.oregonstate.edu/BCCSOCList.aSPx?category=Skills%20Courses&check=True>

## Baccalaureate Core Requirements

Course in **BOLD** are offered through Ecampus. A complete list of Baccalaureate Core Classes can be found at: <https://catalog.oregonstate.edu/earning-degrees/bcc/>.

# AREAS OF SPECIALIZATION

A specialization “option” is a **required** part of the Natural Resources major that allows the student to develop depth and focus in a particular area of natural resource management. All specialization options are required to have a minimum of 40 credits with at least 20 upper division credits. Students may pursue any specialization but some courses may only be offered on certain campuses or online. Students should plan their program of study with their academic advisor.

| Area of Specialization                | Campus Availability                      | Description  |
|---------------------------------------|--|--|
| <b>Conservation Law Enforcement</b>   | <i>Corvallis, Ecampus</i>                | Students will be prepared to enter careers in Conservation Law Enforcement with an understanding of the criminal justice system, environmental law and policy, human dimensions and sustainable resource management.   |
| <b>Ecological Restoration</b>         | <i>Corvallis, Ecampus</i>                | <p>This option will help students understand complexities associated with restoration of terrestrial and aquatic ecosystems, and how restoration decisions involve significant interactions between ecological and social systems.</p> <p>This option requires that you have taken BI370 Ecology and therefore you must have taken the BI2XX series at OSU or a transfer course that is articulated as BI LD2.</p>   |
| <b>Fish and Wildlife Conservation</b> | <i>Corvallis, Ecampus, OSU-Cascades,</i> | <p>This option prepares students for a career in the broad arena of natural resource and wildlife conservation. It emphasizes understanding the relationship between animal species and their habitat requirements and the ability to apply this knowledge to the management ecosystems as a means of conserving fish and wildlife.</p> <p>This option requires that you have taken BI370 Ecology and therefore you must have taken the BI2XX series at OSU or a transfer course that is articulated as BI LD2. Students should also take BI 370 General Ecology at OSU or an equivalent transfer course. Check with your advisor to make sure courses transfer appropriately!</p> |
| <b>Forest Ecosystems</b>              | <i>Corvallis</i>                         | This option will assist students in understanding the nature of forest ecosystems and the processes by which they function. Course work includes an understanding of the multiple resources and values associated with forest ecosystems and some of the techniques involved in managing them.   |

|   |                           |   |
|---|---------------------------|---|
|   |                           | <p>This option requires that you have taken BI370 Ecology and therefore you must have taken the BI2XX series at OSU or a transfer course that is articulated as BI LD2.</p> <p>Students in this area of specialization may be interested in becoming a certified Forester through the <a href="#">Society of American Foresters</a>. Natural Resource students can earn certification through Option #2 by meeting credit hour requirements for certification.</p>  |
| <b>Human Dimensions</b>                 | <i>Corvallis, Ecampus</i> | <p>The student will develop an understanding of the interconnectedness of human behavior and well-being and natural resources. It includes skills and knowledge to better understand the cultural, social, political and philosophical issues associated with natural resources, and prepares students to work with various stakeholders in natural resource management.</p>  |
| <b>Integrated Conservation Analysis</b> | <i>Corvallis</i>          | <p>Students pursuing this option will learn to recognize, understand, analyze and evaluate complex natural resource problems through a cross disciplinary approach. They will contribute to finding solutions to these critical issues by developing depth of knowledge in a disciplinary focus and by preparing to work on cross disciplinary teams. Students will learn to communicate their findings effectively to diverse groups and apply conflict resolution, leadership, and collaboration skills effectively.</p> <p>Students will prepare a brief <a href="#">petition</a> that describes the area of disciplinary depth in which they will focus. They will choose a political, social or ecological focus related to their career goals. This petition is approved by the Natural Resources Program Director.</p> <p>Students pursuing an ecological disciplinary focus would be best served by taking the 200 level of biology or a transfer course equivalent to BI LD2 and then BI370 General Ecology.</p> |
| <b>Landscape Analysis</b>               | <i>Corvallis, Ecampus</i> | <p>This option prepares students to work with Geographic Information Science technology in a natural resource fields such as wildfire ecology, land use planning, forestry, ecological restoration, and more. The pairing of the technical skills of GIScience with a disciplinary knowledge in a natural resource area will prepare students for the practical application of technical skills in the real world.</p> <p>Students in this option will need to take MTH 112 Elementary Functions for their mathematics requirement.</p> <p>In addition, this specialization option will allow students to earn the <a href="#">GIScience Undergraduate Certificate</a> through the College of Earth, Ocean, and Atmospheric Sciences concurrently with</p>  |

|                                   |                           |   |
|-----------------------------------|---------------------------|---|
|                                   |                           | <p>their BS degree through the College of Forestry. The student will apply to the GIS Certificate Program as well as the Natural Resources Program.</p> <p>Students should contact Kuuipo Walsh, GIScience Certificate Program Director, to enroll in the GIScience Certificate Program. (kuuipo.walsh@oregonstate.edu)</p> <p><b>No S/U grades are accepted for the courses that are counted for the GIS Certificate.</b></p> <p>Students will prepare a brief <a href="#">petition</a> that describes the Natural Resources Electives that they wish to complete in this area of specialization. This is approved by the Natural Resources Program Director.</p>  |
| <b>Natural Resource Education</b> | <i>Corvallis, Ecampus</i> | <p>This option will prepare students for careers as natural resource educators. Students may choose to focus on teaching in informal settings such as interpretive centers, aquariums, museums and parks or pursue a career in formal education in a K-12 classroom.</p> <p>Students on the Corvallis campus may wish to explore the <a href="#">Education Double Degree program</a> offered by the College of Education which allows students to earn a BA or BS in Education as well as their BS in Natural Resources. Courses in this option may be double counted with the Education Double Degree where applicable. Students in the Double Degree Program would seek <a href="#">Content Mastery</a> for certification in biology or integrated science in order to teach in middle school or high school.</p> |
| <b>Policy and Management</b>      | <i>Corvallis, Ecampus</i> | <p>This option will prepare students for careers in the broad arena of natural resource management and environmental conservation, with an emphasis on the social and political aspects of resource issues.</p>   |
| <b>Urban Forest Landscapes</b>    | <i>Corvallis, Ecampus</i> | <p>This option will help students understand the complexities surrounding the culture and management of urban forest ecosystems. It includes an examination of the economic, social, and environmental benefits and values of trees in urban areas, and the relationship between people and trees.</p>  |
| <b>Wildland Fire Ecology</b>      | <i>Corvallis, Ecampus</i> | <p>This option will help students understand the nature of fire in wildland ecosystems. It includes an understanding of the dynamics of fire behavior and post-fire response.</p>   |

|   |                            |  |
|---|----------------------------|--|
|   |                            | <p>Students in this option should take MTH 112 Elementary Functions for the NR mathematics requirement, Soil Science for the Earth/Soil Science requirement, the 2XX level of biology for Biology requirement or courses that transfer of BI LD2, and BI 370 General Ecology for the Ecology requirement or an equivalent transfer course. Check with your advisor to make sure courses will transfer appropriately.</p>   |
| <p><b>Individualized Specialty Option</b></p> | <p><i>All campuses</i></p> | <p>The Individualized Specialty Option (ISO) is a student designed option that allows a student to tailor the academic program to specific goals or interests related to natural resource management. In consultation with their Academic Advisor, students will develop a written proposal for a program of study that meets their goals as well as academic requirements. Students should contact their assigned Academic Advisor for information on developing an Individualized Specialty Option.</p> <p>Students in this option may need to take the 200 level of biology, BI 370 General Ecology and additional chemistry or math depending on their chosen program of study. They should work with their advisor and declare the ISO early so that they are taking the appropriate classes.</p> |

## DISCIPLINARY FOCUS (28 credits minimum)

Student will select an area of study for disciplinary focus from Policy, Social Science/Human Dimensions, or an Ecological Discipline. The student will be required to submit an [academic plan](#) for completion of the option which will be approved by the Natural Resources Program Director. The academic plan must include a minimum of 20 upper division courses.

**Note:** Up to 6 credits of appropriate internships, projects or study abroad may be used to fulfill credit requirements in this option as approved by petition.

**Option Code:** 735 **Total Credits = 40 minimum**

## ELECTIVES (minimum of 14 credits)

Students may choose a minimum of 14 credits from either or both categories below. Students may choose to focus on teaching in informal education settings or formal classroom instruction/licensure in K-12 schools. Corvallis campus students may be interested in the [Education Double Degree program](#) at OSU and Content Mastery in biology or integrated science. Students in the double degree program should work with their education advisor as well as their NR advisor to plan an appropriate plan of study to meet their goals.

| <b>Note:</b> Up to 6 credits of appropriate internships, projects or study abroad may be used to fulfill credit requirements in this option as approved by petition.   |  |   |    |              |    |   |  |
| <b>Advising Notes:</b> Students pursuing the Wildland Fire Ecology Option should check the prerequisites above carefully. Depending on course choices student may need to take a “Biology for Science majors” series. (BI 211/212/213 or BI 204/205/206 or an equivalent series that transfer as BI LD2). Students in this option may also need to take MTH 112 Elementary Functions for the “Mathematics” requirement, Soil Science for the “Earth <u>OR</u> Soil Science” requirement, and BI 370 General Ecology for the “Ecology” requirement. |  |   |    |              |    |   |  |
| <b>Option Code:</b> 687 <b>Total Credits</b> = 40 credits Minimum  |  |   |    |              |    |   |  |

## **Individualized Specialty Option “ISO” (Student Designed)**

The **Individualized Specialty Option** is a student designed option that allows a student to tailor the academic program to specific goals or interests related to natural resource management. This is often a good choice for students who have a significant amount of relevant transfer work or those who have a specific career goal that they are working toward.

In consultation with their Academic Advisor, students will develop a written [proposal](#) for a program of study that meets their goals as well as academic requirements. The proposal is submitted to the Natural Resources Program Director for approval. This plan should be submitted at least 6 terms prior to the planned graduation term. Students should contact their assigned Academic Advisor for information on developing an Individualized Specialty Option.

Here are some examples of recent areas of specializations that students have designed:

Water Resource Management

Agroforestry

Sustainable Wilderness Recreation Management

Environmental Disaster Management

Food in Culture and Social Justice

Holistic Land Management

Marine Ecosystems and Human Impacts

International Resource Management

Rangeland Ecology and Management

Communication and Outreach for Natural Resource Management

Minimum of 40 credits with 20 credits upper division credits required. Available on all campuses.
